

HT Pro Mobile A proven software solution for managing your hearing conservation business

What do you get with HT Pro Mobile?

DATABASE DETAILS AND SCALABILITY

- PC-based software with capabilities for multiple databases
- Same price for single or multi database installations
- SQL Server databases on office Hub and mobile testing units
- Mobile software for 2-, 4-, 6-, or 8-man mobile testing units
- Scalable software from one mobile testing unit to dozens

Office-based software (the Hub) and mobile software systems allow for maximum flexibility and scalability. Send your mobile units their own managed databases. Your office Hub software can dispatch and retrieve testing data to and from the mobile testing units from your office, without disruption of service at the Hub or Mobile Testing Unit.

FEATURES

- Multiple levels of security
- Compatibility with a number of audiometers
- Multimedia-ready with Tremetrics RA 650 for interactive, computer-voice instructed testing
- On-screen real-time hearing tests transferred from audiometer
- Extensive use of wizards to guide you in data entry
- Automatic baseline revision
- Separate left and right baseline revisions
- A built-in screening system for the reviewing audiologist
- Daily biological log
- OSHA 300, 300A, and 301 logging and reporting
- Octave band noise reports
- Option to print a notification at the time of test
- Reports: Powerful printable reporting and graphing capabilities: e-mail PDF reports, create Web site reports
- Compatibility with INTEGRAfit—Quantitative fit testing for any brand of earplugs

SUPPORT

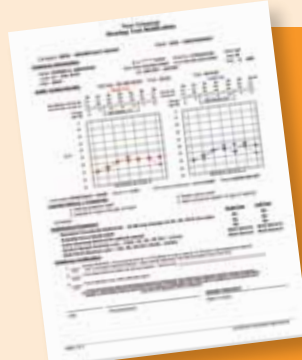

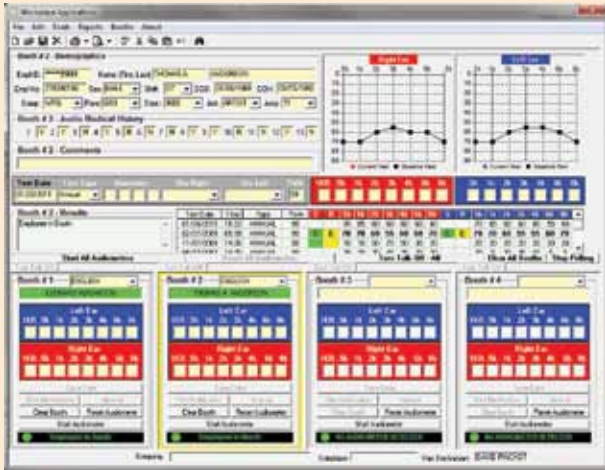

- Built-in help files with instant answers to software questions
- Live customer service
- Internet software support
- Sold with software installation, training, and on-going support

Optional: Additional modules available for multi-phasic operations: track pulmonary, medical results and much more.

Need a turn-key system? Choose our **iMobile** option for online access for your own audiologist OR WPI complete audiologist review services. (See back)
