

RA300 Digital Audiometer

The affordable RA300 brings a new level of automation to a broad range of hearing screening programs. Small occupational health departments as well as hospital/community health programs can now benefit from Tremetrics' proprietary test paradigm which produces valid test results in as little as three minutes. The compact unit includes an easy to read, backlit display and outputs data to standard printers or PCs through its RS232C port.

The RA300 *Plus* features an integral talk over microphone, 64-audiogram storage and patented multimedia capability,* allowing compatible PC software such as Workplace Applications to conduct interactive, computer-voice instructed hearing tests.

CHECK THE EXTRA VALUE FEATURES

- Built to Tremetrics high quality standards
- Meets ANSI/OSHA requirements
- Integral RS232C computer/printer interface
- Flexible reporting formats
- Automatic power compatibility worldwide

*U.S. Patent No. 5,811,681
